DETAILED ACTION

1. Claims 60-77 are presented for examination. Claims 19-59 are cancelled. Claims 60-77 are new.

2. Newly submitted claims 60-77 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18 (now claims 60-77), drawn to loading initialization program, classified in class 713, subclass 2

II. Claims 19-59, drawn to computer network managing, classified in class 709, subclass 223

The inventions are distinct, each from the other because of the following reasons:

Inventions I, and II are related subcombinations and disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown separately usable. In the instant case, invention I has separate utility such as in a System lacking booting, loading initialization program, particulars. Invention II has separate utility such as in a System lacking management agent, management server. See MPEP §

806.05(d). Also the restriction requirement is based on the interpretation that every dependent claim is dependent on the preceding independent claim (note Applicant's claim numbering).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because as shown by their different searches and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 60-77 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Applicant cannot file an RCE to obtain continued examination on the basis of claims that are independent and distinct from the claims previously claimed and examined as a matter of right (i.e., applicant cannot switch inventions).

3. Examiner has no recollection of the telephone call with regards to applicant's contention that limitations of claims 1-18 not taught by O'Toole or Hubacher references.
